PROFESSIONAL SUMMARY

Results-driven Senior Ruby on Rails developer with 5+ years of experience building scalable, production-grade web applications. Proficient in full-stack development using Rails, React, and PostgreSQL, with hands-on experience integrating AI/GenAI solutions, designing RESTful APIs, and leading end-to-end product delivery. Passionate about clean architecture, performance, and mentoring fellow developers.

WORK EXPERIENCE

Danphe Software Labs

Previous Role

Ruby on Rails Developer

- ▶ **HR Management System** — Built a comprehensive HR platform handling employee records, payroll, leave management, and reporting with role-based access control.
- ▶ **RecognizeApp** — Developed employee recognition and engagement platform with real-time notifications, peer-to-peer kudos, and leaderboard features.

TechRecognize

Previous Role

Full-Stack Developer

- ▶ **Web Design & Development** — Designed and built responsive, SEO-optimised websites including *Infusiontrip*, *AdelaideBudgetCars*, and *HRintent*.
- ▶ **Job Portal Web Application** — End-to-end Rails + React job platform with candidate profiles, employer dashboards, smart search, and application tracking.
- ▶ **Delivery App** — Built a logistics and delivery management application with real-time order tracking, driver assignment, and admin analytics.

Bajra Technologies LLC

Previous Role

Ruby on Rails Developer

- ▶ **Smart Sorting** — Developed an intelligent sorting and classification system, integrating algorithmic logic with a clean Rails API and responsive frontend.

Splendour Group

Previous Role

WordPress Developer & Web Designer

- ▶ **Web Design** — Created modern UI/UX designs and responsive layouts tailored to client branding requirements.
- ▶ **WordPress Development** — Built and customised WordPress themes and plugins for corporate websites with performance optimisations.
